

Central Maryland 2

Location

The Central Maryland 2 provides stormwater management to the Central Maryland Service and Distribution Center and is located on private property adjacent to Klees Mill Road, between Enterprise Road and MD 26 in Sykesville, in the Liberty Reservoir Watershed.

Description

The project will retrofit the Central MD 2 facility to provide water quality for the untreated impervious area. The drainage area to this facility is approximately 53 acres, 31 of which is impervious.
