Langdon Property

Location
The Langdon project is located in Westminster adjacent to Westminster Avenue. This site is in the Double Pipe Creek watershed.

Description
The facility will treat a total of 181 acres of urban drainage that currently flows untreated into the existing stream channel. The project will reduce the non-point source pollution entering the Double Pipe Creek and Chesapeake Bay watersheds and alleviate current flooding issues.

Project Engineer
CLSI, Inc.

Contractor
HTI

Project Budget
Engineering: $104,358
Construction: $1,696,300

Project Timeline
Construction is well underway. Excess material is being hauled offsite by Maryland Midland Rail. Weather permitting, two trips are hauled per day, five days per week. Staumbaugh’s, Inc. is managing the fill site where material is unloaded from the railcars.

Updates
BRM was awarded a State Highway Administration (SHA) grant for $979,941 and a Department of Natural Resources grant for $900,000.
