# Medication Disposal Program

**Do you have questions  
about the program?**

**Contact the Recycling  
Office at 410-386-2510**

## Carroll County Medication Disposal Program

Starting at the Household Hazardous Waste Event on October 24, 2009, Carroll County launched a year-round medication collection and disposal program. The program is designed to help lessen the impact of medication on the environment.

### What harm do drugs do?

Medications that are poured down the drain or flushed end up in our waterways and drinking water, and wastewater treatment plants cannot remove the chemicals in those medications. Medicine discarded in the trash can also leach into water supplies. Medicines such as antibiotics, hormones and contraceptives, antidepressants, and pain relievers have been discovered in waterways nationwide.

The risks of such chemicals in our waterways and drinking water include damage

to unborn children, dangerous mutations in wildlife - such as the sex reversal in fish or even causing fish to be born with both male and female reproductive organs and the development of antibiotic-resistant strains of bacteria. Because of these and other harmful effects, it is necessary to provide county residents with a proper way to dispose of unwanted medication.

### What can I do?

#### First things first: Don't Rush to Flush!

Flushing medication will cause these potentially harmful chemicals to seep into our drinking water, our rivers and streams, and into the Chesapeake Bay. Dumping medicine in the trash also can cause harm: not only can animals get into garbage and ingest the medications, but rainwater dissolves and washes them away, depositing them in our waterways regardless.

Carroll County is leading the way with the medication collection and disposal program. County residents can bring their medication, prescription and over the counter to the collection centers (located at police stations throughout the county), where they will be disposed of properly. Please seal liquids in a leakproof plastic bag.

This program is approved by the the Drug Enforcement Administration (DEA) and overseen by the Carroll County Sheriff's Office.
