The Carroll County Department of Public Safety - Emergency Management encourages people to follow these safety tips when temperatures are extremely cold:

- Minimize outside activities, particularly among the elderly and very young. Check on family members and neighbors who may be more vulnerable to the cold.
- Pets are also sensitive to the cold; remember to consider your pets' needs when planning outside activities.
- Dress in several layers of loose-fitting, lightweight clothing rather than a single layer of heavy clothing. Wear a hat and mittens/gloves to stay warmer.
- Be aware of frostbite. If a part of the body loses feeling and the skin feels waxy or looks white or grey, warm gently and seek medical help.
- Watch out for hypothermia. Shivering, memory loss, confusion, slurred speech, and drowsiness are all warning signs. Seek medical attention for signs of hypothermia.
- Use caution when heating your home. For tips on how to safely use space heaters, fireplaces, woodstoves and refer to the U.S. Fire Administration's [home heating safety handout](#).
- If using a space heater, be aware of the possibility of carbon monoxide poisoning. For more information on carbon monoxide poisoning visit the [Centers for Disease Control and Prevention \(CDC\) website](#).
