

Overview of Public Works CIP

The Public Works FY 17 – 22 CIP includes two separate sections: Roads and Bridges.

Johnsville Road Sidewalk project will provide a connection to Eldersburg Elementary School, Liberty High School, residential neighborhoods, and the commercial corridor along MD 32 (Sykesville Road) via Bartholow Road. This project will be 80 percent funded for design and construction costs by the Safe Routes to School Program, administered by the Maryland Department of Transportation.

Approximately \$82 million is included in the FY 17 – 22 CIP to maintain roads throughout the County. Approximately thirty-five percent of the County's road network are considered mainline or arterial roads. These roads typically carry a higher traffic volume. Sixty-five percent are lower volume roadways, including neighborhood roads. Typical repair strategies include: patching, overlay, mill and overlay, full depth reclamation and reconstruction.

Also included is ongoing bridge maintenance and replacement/repairs for four bridges.

For additional information on these or other Public Works projects, please refer to the individual project pages.
